

# EMPLOYMENT AND LIVELIHOOD DEVELOPMENT: SKILLS AND TRAINING

A Presentation for UNITAR

# AREA OF FOCUS

**Empowering Individuals with  
Disabilities in Africa to Acquire  
Marketable Digital Skills,  
Enhancing their Employability and  
Fostering Financial Independence.**

# CONTENTS

Introduction

Executive Summary

Disabilities  
Statistics

Targeted  
Categories  
of Disabled

Importance  
of Empowering  
the Disabled

Challenges faced by the  
Disabled in Acquiring Digital  
Skills

Addressing Barriers

Solutions for Bridging  
the Digital Skills for the  
Disabled

Conclusion

# EXECUTIVE SUMMARY

Empowering Individuals with Disabilities for Equitable Employment and Ensuring Financial Self-Reliance through Essential Abilities and Resources

Provide individuals with disabilities with essential abilities and resources

Overcome employment barriers for fulfilling careers

Enable financial self-reliance through equitable employment

# DISABILITY EMPLOYMENT SITUATION IN AFRICA

Approx. 1 billion people globally live with disabilities, 80% in developing countries

In Africa, disability rates are higher in rural areas, women, older people

Employment rate for people with disabilities: 35% vs. general population: 73%

SDGs include persons with disabilities in employment targets, but data is scarce

Persons with disabilities in West Africa face employment discrimination and gaps

# 84%

of persons with disabilities in Africa lack disaster preparedness plans

## Challenges and Statistics

Only 15% of persons with disabilities in Africa were employed in 2019

Barriers to acquiring digital skills: discrimination, lack of education, inaccessible infrastructure

# FOUR MAIN CATEGORIES OF DISABILITIES WE SERVE

Behavioural  
or emotional  
disabilities

Physical  
disabilities

Sensory  
impaired  
disorders

Developmental  
disabilities

## KEY REASONS FOR EMPOWERING INDIVIDUALS ...

Upholds human rights and dignity, ensuring equal opportunities and inclusivity

Contributes to economic development and prosperity

Provides equal access to education and taps into potential and creativity

Facilitates empowerment through supportive legal and policy frameworks

Promotes social inclusion and breaks down barriers to full societal participation

Improves health and well-being through better access to healthcare and mental health support

Fosters cultural and attitudinal shift towards acceptance and respect

Aligns with global development goals, particularly SDG 4, 8, and 10

# OVERCOMING DIGITAL CHALLENGES FOR PEOPLE WITH DISABILITIES

Designing accessible digital skills training programs with screen reader compatibility, keyboard navigation, and captioning

Providing financial support for assistive technologies and adaptive equipment

Offering mentorship, peer support, and networking opportunities

Promoting inclusive hiring practices and workplace accommodations

Raising awareness and advocating for greater representation and inclusion

# TARGET DIGITAL SKILLS TO BE ACQUIRED

In-demand competencies in the digital age

Digital Marketing:  
Understanding  
the shift to online  
business presence  
and branding

Cloud Computing:  
Accessing  
on-demand  
computing  
resources

Data Analytics:  
Transforming  
raw data into  
business insights

Coding: Writing  
instructions  
for computers  
to communicate

# ACCESSIBILITY SOLUTIONS – Our Approach

**Accessibility and Inclusivity:**  
— Implement accessible design principles —  
Compatibility with assistive technologies

**Financial Literacy:**  
— Improve financial knowledge with educational resources — Offer accessible tutorials

**Skill Development and Education:** — Connect users with educational resources and training programs — Establish partnerships with educational institutions

**Employment Opportunities:**  
— Connect users with job opportunities — Promote inclusive hiring practices

**Accessible Banking and Financial Services:**  
— Collaborate with financial institutions — Provide alternative communication methods

**Community Engagement:**  
— Create forums or discussion boards — Organize virtual events and webinars

# MEASUREMENT AND ITERATION

## Strategies for Project Success

Increased employment  
rates among users

Higher financial  
literacy and knowledge  
retention

Positive user feedback  
on platform  
accessibility  
and features

Successful advocacy  
efforts leading  
to policy changes

Regularly gather user  
feedback

Iteratively update  
the platform

Enhance accessibility  
through collaboration

Maintain ongoing  
relevance  
and effectiveness

# CONCLUSION

In summary, empowerment and financial inclusion for individuals with disabilities addresses the following:

Contributes to social justice

Builds diverse and resilient community

Investment in society's well-being and prosperity

Thrives on contributions of all members

Fosters independence and equality
